Research Analyst

Full Time (Remote)

Firm Description

Symbolic Capital is a founder-led investment firm supporting the best web3 projects globally. Built by web3 founders, we are committed to using our background as builders to provide hands-on support to our portfolio companies.

As a research analyst, your responsibilities will include but are not limited to:

Role Description

- Perform technical due diligence on potential investments (review and synthesize whitepapers, GitHub, technical demos, etc.) and present clear and concise reports to the investment team
- Write research reports and blog articles to present to the investment team
- Identify the data, information, and/or analysis needed to evaluate live deals and conduct timely research to support investment decisions
- Sit in on introductory calls with founders
- Engage and support portfolio companies
- Help with other ad-hoc fund activities when needed

Requirements

- Undergraduate degree or above from globally renowned universities, or currently enrolled
- Technical background required (e.g. computer science, electrical engineering)
- Deep experience in the crypto & blockchain space
- Prior technical experience at a web3 protocol or project preferred but not required
- Strong interpersonal skills required; ability to communicate clearly, connect with, and form relationships with team members and founders is critical
- Proficient with writing research articles and technical blog posts
- Willingness and enthusiasm to learn new topics and be dynamic in a rapidly evolving company and space
- Ability to work on East Coast, USA hours

Application

- If you are interested, please send an email with your resume and any other relevant information with the subject line of "[Research Analyst] Name" to **talent@symbolic.capital**
